

Content

7 Process drives

- New Generation Driveline of the CLAAS CUBIX Large Square Baler** 1
A. Roth, Antriebstechnik-Roth, Much, Germany;
L. Rongvaux, CLAAS France S.A.S., Woippy, France
- Electrification of special construction method Cutter Soil Mixing** 9
H.-P. Otto, BAUER Maschinen GmbH, Schrobenhausen, Germany
- New clutch-controlled CVT in fertiliser spreader operation** 21
M. Euler, Antriebstechnik-Roth GmbH, Much, Germany

7 Traction drives

- Line traction advantages and solution for automatic power distribution to all wheels in practice** 31
S. Herr;
J. Müller, Müller Landmaschinen GmbH, Bonndorf, Germany
- Dual-speed transmission for electric off-highway machines** 45
L. Serrao, Allison Off-Highway Drive and Motion Systems, Rovereto, Italy
- A Case Study on a 7-Ton Parallel-Series Hybrid Wheel Loader** 59
Y. Kakichi, YANMAR Holdings Co., Ltd., Helmond, Netherlands;
J. Schaub, A. Müller, FEV Europe GmbH, Aachen, Germany

7 Electric systems architecture

- Innovative Drive and Charging Solution for Automated Field Work** 77
S. Klausner, M. Breitkopf, Fraunhofer IVI, Dresden; J. Fehrmann, TU Dresden, Germany
- System architecture development for advanced cooling and heating systems in electrified agricultural machinery** 97
B. Wilk, P. Heymann, J. Wieckhorst, Claas Industrietechnik GmbH, Paderborn, Germany;
L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Technische Universität Braunschweig, Germany
- Challenges in Electrification (of Construction Machinery) Beyond the Machine Itself** 111
D. Bachmann, Liebherr Energy Solutions GmbH, Baden (AG), Switzerland

7 Real world experience of electrification

Ten Years of Electrifying Mobile Working Machines Using Automotive Components – Experience, Challenges, and Solutions	117
S. Dirnberger, Bosch Engineering GmbH, Holzkirchen, Germany	

From Prototype to Series Production	
Development of an Electrified Tractor	135
T. Steidle, AGCO GmbH, Marktoberndorf, Germany	

Drivetrain Design for a Battery Electric, Agricultural, Utility, Tractor	141
E. Van Boening, Deere & Company, Waterloo, USA	

Successful electrification of towbarless aircraft tractors	
How to transform an industry through customer valuer	151
M. Rieser, Goldhofer AG, Memmingen, Germany	

7 Powertrain comparison

Application meets power class –	
Is there ONE optimal powertrain architecture?	157
T. Wopen, M. Adelt, AVL Deutschland GmbH, Neuss, Germany	

Hydrogen Engine or Fuel Cell Tractors? Comparison of	
Operational Performance on Medium-Scale German Farms	171
T. Wyszynski, L. Reuter, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Technische Universität Braunschweig, Germany	

Electrifying Agriculture:	
Exploring Hybrid Powertrain Solutions for Tractors	191
C. Schörghuber, R. Hempel, S. Pretsch, AVL List GmbH, Steyr, Austria	

7 Systemic developments

**Electrification of Off-Highway Machinery and Modular Battery Swapping
Advantages and technical challenges. Practical experiences** 201

S. Schlegel, D. Hornung, raumideen GmbH & Co KG, Isny, Germany

**Hydrogen in Agriculture
An energy self-supply-concept for an agricultural business** 211

H. Vorjans, F. Brumann, L. Eckstein, Institute for Automotive Engineering (ika),
RWTH Aachen University, Germany

Mining Reinvented: The T 264's Journey to Zero Emissions 231

I. Isabelle Ays, Liebherr-Mining Equipment Colmar SAS, Colmar, France

7 Excerpt from poster exhibition

**Requirements and strategies for the integration of
hydrogen fuel cell systems in mobile machines** 247

A. Kampker, H. H. Heimes, J. Hausmann, S. Biegler, G. Walter, J. von Harling,
Production Engineering of E-Mobility Components (PEM), RWTH Aachen University,
Germany

**Generating hydrogen where it's needed Decentralized supply concepts
for mobile machinery in open-pit mining** 263

A. Kampker, H. H. Heimes, J. Hausmann, F. Jonen, M. Bayerlein, Production
Engineering of E-Mobility Components (PEM), RWTH Aachen University, Germany

**Increasing the storage density and energy efficiency of emission-free
drives through the use and intelligent integration of liquid hydrogen
storage systems and fuel cells** 275

F. Jonen, A. Kampker, H. H. Heimes, J. Hausmann, G. Walter, S. Biegler, Production
Engineering of e-Mobility Components (PEM), RWTH Aachen University, Germany

**Simulative powertrain design of electrified working machines
based on real life operation data** 291

M. Siegel, Hochschule Landshut, University of applied sciences, Germany

New electric dynamic shift drive 305

M. Euler, Antriebstechnik-Roth GmbH, Much, Germany
