

Content

7 Electric Drive Units

- Advanced Electric Drive Architecture of the Mercedes-Benz EQS** 1
M. Weiss, O. Vollrath, G. Paul, L. Henle, N. Waldbüßer, D. Hopp, C. Dörr,
Mercedes-Benz AG, Stuttgart
- Bosch eAxle Platform: Building blocks to provide worldwide eAxle solutions** 23
Q. Werner, P. Dengler, A. Angersbach, Robert Bosch GmbH, Schwieberdingen
- Compact, Cost-Efficient, Modular and Sustainable
Next Generation EDU for Compact and Medium Size Electric Vehicles** 37
P. Schatz, AVL List GmbH, Graz

7 AI in the Product Development Process

- Data-Driven Prediction of Acoustic Properties for Electric Drives in
Gear Manufacturing Using Machine Learning Algorithms** 47
B. Friedrich, F. Leng, BMW Group; R. Szakacs, S. Carpano, I. Balestra, A. Fritz,
OmegaLambdaTec GmbH; J. Chytraeus, Y. Wang, J. Metternich, TUD-PTW;
M. Padrón Hinrichs, F. Sohnus, R. H. Schmitt, RWTH-WZL

7 Optimized E-Drives

- Investigations on the efficiency and heat balance of highly
integrated E-Drives with high power density** 61
B. Schwarz, P. Strobl, T. Lohner, K. Stahl, Technical University of Munich,
School of Engineering and Design, Department of Mechanical Engineering,
Gear Research Center (FZG), Garching
- Multi-objective Optimization of a Modular eDrive Platform for Truck
Portfolios Considering Transmission Lifetime and Load-Capacity** 79
P. Hätscher^{1,2}, A. Kulzer¹, S. Köller²,
¹Institute of Automotive Engineering Stuttgart (IFS), Stuttgart;
²Daimler Truck AG, Leinfelden-Echterdingen
- Harmonic Current Injection in Electric Drive Systems Impacts
on NVH, Temperature, and Reliability** 97
M. Janousek, D. Werner, AVL Deutschland GmbH, München;
M. Schrottner, AVL List GmbH, Graz

7 Range Extender

Li Auto New Generation of Powertrain Platform for Range Extender Electric Vehicles – XPD	109
---	------------

J. Chen, L. Zheng, D. Jia, Li Auto Germany R&D Center, Munich

Potential Analysis of Range Extended Two-Drive-Powertrains	127
---	------------

A. Kappes, S. Rinderknecht, TU Darmstadt, Darmstadt

7 Materials and Sustainability in E-Motors

Raw material price scenarios as a basis for selecting electric motor architectures	145
---	------------

J. Flemming, P3 group, Stuttgart

Sustainability Potentials for E-Motors in a Circular Economy	159
---	------------

D. Heinrich, B. Groschup, Schaeffler, Automotive Buehl GmbH & Co. KG, Bühl
M. Miereisz, Schaeffler Technologies AG & Co. KG, Herzogenaurach

Rotor shaft as the center of traction motor – From the idea to the series production of a three-part rotor shaft with polygonal tube	167
---	------------

H. Gürbüz, B. Dönges, Mubea (Muhr und Bender KG), Weitefeld

7 Customer, Regulations, Environment

The Future of Drivetechnology – How Electrification and Digitalization Reshape the Market	183
--	------------

M. Hein, H.-J. Mayer, Radermacher & Partner GmbH, Starnberg

Legal requirements at one click!	197
---	------------

L. Schäfers, F. Schmidt, R. Savelsberg, FEV Europe, Aachen

CO₂ Footprint of Alternative Powertrain Solutions for Heavy Duty Vehicles A comparative Life Cycle Assessment of long haulage trucks	211
--	------------

Ö. Deniz, MAHLE International, Stuttgart

7 EV Topologies

- Multi-criteria optimization of innovative multi-speed and multi-motor electric powertrains** 225

C. Reus, S. Rinderknecht, Institut für Mechatronische Systeme, TU Darmstadt

- Design and Development of a Novel Automatic Powershift Transmission for Battery-Electric-Vehicles** 241

J. Tromayer, TU Graz

- High-Performance In-Wheel Platform for Seamless Integration in Electrified Vehicles** 263

J. Kern, B. Grafenauer, Elaphe Propulsion Technologies Ltd., Ljubljana

7 Trends in Power Electronics for Drivetrains

- Automotive Traction Inverter with GaN Power Stage in a Road Ready Vehicle** 285

M. Deiml, E-Drive Innovation Center, AVL; H. Winter, Product & Project, VislC;

T. Heilmeyer, Development Engineer, AVL Software&Functions GmbH, Regensburg

7 Bearing Currents

- Parasitic bearing currents in oil-cooled electric motors – fundamentals and initial results** 299

R. Charissé; B. Deusinger; Y. Burkhardt, Technical University of Darmstadt, Darmstadt;

S. Paulus; S. Graf; O. Koch, RPTU University Kaiserslautern-Landau, Kaiserslautern

- Simulation of parasitic currents in electric drive train systems – Electric system simulation of motor and mechanical drive train** 315

B. Jakob, M. Correns, D. Stretz, C. Wagner,

Schaeffler Technologies AG & Co. KG, Herzogenaurach

- Insulation Solutions for Electric Drivetrains Because Sparks Belong in Romance, not Bearings** 329

R. Jackowiak, P. Pauchard, DuPont Specialty Products Operations Sàrl, Meyrin, Switzerland;

C. Berger, DuPont de Nemours Deutschland GmbH, Neu-Isenburg, Germany

7 Immersion Cooling

- Introduction of Battery immersion Cooling into the vehicle thermal system** 347
S. Scherer, A. Fuchs, T. Raffius, Robert Bosch GmbH, Stuttgart
- Design and Multi-Scale CFD Analysis of Inter-Cell Flow
Guiders in Immersion-Cooled Prismatic-Cell Battery Modules** 367
G. Ogus, Z. Zeren, B. Peremans, B. Aerts, A. Surti, S. Schlimpert,
Flanders Make, Core Lab MotionS, Lommel, Belgium;
L. Cnudde, M. De Paepe, FlandersMake@UGent, Core lab MIRO, Gent Belgium
- From Regulation to Innovation: Tackling Thermal Runaway
Propagation through Simulation and Immersion Cooling** 381
F. Menz, ElringKlinger AG. Neuffen

7 Integrating AI into Products

- Cloud-Based Approach: Neural Networks for Live Temperature
Monitoring in a PHEV – Advanced In-Vehicle Development** 393
M. Adrian, G. Göppert, Schaeffler Automotive Buehl GmbH & Co. KG, Bühl;
K. Gere, Schaeffler Savaria Kft.
- AI-based Virtual Sensors and their Applications in Vehicles** 407
J. Fiedler, M. Burger, Fraunhofer ITWM, Kaiserslautern
- Sensitivity Analysis and Surrogate Modeling of Geometric
and Material Tolerances in an Axial Flux Machine** 423
K. Müller, A. Wanke, Mercedes-Benz AG, Stuttgart, Germany;
H. De Gersem, Y. Burkhardt, TU Darmstadt, Darmstadt, Germany

7 E-Drive Topologies

- High Revolution Drive – High-rpm concept for Electric Drives** 447
S. Demmerer, C. Gürlich, D. Jonak, ZF Friedrichshafen AG, Friedrichshafen; Germany
- The rare-earth-free axial flux induction machine as the
next-generation electric drivetrain** 455
M. Güttinger, Emil Motors GmbH, Hersbruck, Germany

Improved Winding Technology for Axial Flux Motors to Enhance Performance and Efficiency	469
F. Sell-Le Blanc, D. Kuhl, Schaeffler Automotive Buehl GmbH & Co KG, Bühl	
2-speed electric drive unit with dual rotor electric machine and modular range extender variant	483
G. Hellenbroich, FEV Europe GmbH, Aachen, Germany	

7 Lubrication

Smartification of Electric Oil Pumps using multiple flow to optimize powertrain efficiency	493
P. Bahr, Senior Expert Electric Pumps, Valeo	
Low viscosity heavy-duty EV fluids How esters can contribute	507
M. Auerbach, Cargill Bioindustrial, Gouda	

7 Architecture

The Architecture of Innovation: A Guide to RL-NLP Hybrid Design With application to gearbox design optimization for electric vehicles	523
L. Oerlemans, T. Hofman, Eindhoven University of Technology, Eindhoven	

7 Manufacturing Technology

Field analysis of how materials and manufacturing processes influence e-motor cores properties	533
D. Kirigo, Feintool System Parts Sachsenheim GmbH, Sachsenheim	
Sustainable Rotor Shaft Manufacturing Reducing the CO₂ Footprint with Cold Forming Innovations	551
N. Missal, M. Ludwig, S. Schwertel, Felss Systems GmbH, Königsbach-Stein	
Implementation of Machine Learning in Definition and Production of Transmissions for Electric Vehicles	565
A. Grunwald, P. Geradts, R. Schlack, S. Damm, Dauch Corporation	

7 Poster Exhibition*

- Accelerated Bottom-Up Development of an Electric Motor Drive Simulation Toolset with Low Resource Utilisation** 581
M. Horvát, EXEDY Clutch Europe Ltd trading as Saietta Electric Drive, Towcester, Northamptonshire, United Kingdom
- Innovation Powered by High-Fidelity Multiphysics Modeling: A Holistic System Optimization of BorgWarner's Next Generation Integrated Drive Modules**
Methodology for development of next-generation BorgWarner Integrated Drive Modules (iDMs) for electric vehicles 583
A. Leblay, BorgWarner, Luxembourg
- Heat sink with cooling channel manufactured using the MAGIT® gas injection technology directly in the die-casting process** 585
M. Op de Laak, TiK-Technologie in Kunststoff GmbH, Teningen
- Development of an Electrified Tracked-Vehicle Simulation Model for Optimal Steering Performance** 587
G. Han, Y. Park, Department of Biosystems Engineering, Seoul National University, Seoul, Republic of Korea
- Design Optimization of a Two-Stage EV Gearbox Using the Multiverse Optimization Algorithm Based on Real-World Load Duration Distribution** 589
D. Moon, S. Park, M. Lee, Y. Park, Department of Biosystems Engineering, Seoul National University, Seoul, Republic of Korea
- Function development and optimization of drive components in a customized test environment** 591
M. Bader, M. Ratasich, K. Scherz, Institut für Maschinenelemente und Entwicklungsmethodik, TU Graz
