Content

Tractors, Self-Propelled Agricultural Machinery

Vehicle Dynamics Update on new 6R Series 1
R. Starck, John Deere GmbH & Co. KG, Mannheim, Germany

Chassis Design Potential in Conventional Tractors for the Improvement of Driving Safety and Driver Vibration Isolation 3
A. Bürger, S. Böttinger, Institute of Agricultural Engineering, University of Hohenheim, Stuttgart

Systematic Comparison of Hybrid Powertrain Architectures for Agricultural Tractors under Realistic Working Cycles 11
C. Schörghuber, J. Roth, AVL List GmbH, Steyr, Austria

AgTech Fertilisation & Crop Protection

Online adaptive path planning for UAVs for weed detection, including adaptive gimbal pitches and yaw angles 21
W. Pitzl, R. Völker, L. Lachmann, P. Riegler-Nurscher, Josephinum Research, Wieselburg

Comparison of tractor and drone-based application methods in plant protection A systemic assessment of application methods for biological as well as conventional plant protection products 29
R. Konradt, A. Scholz, Otto von Guericke University, Magdeburg

DEM-Based Prediction of Lateral Spreading Distribution Quality for Agricultural Manure Spreaders 35
J. Schlenker, M. Lindner, C. Korn, Institute of Natural Materials Technology, Chair of Agricultural Systems Technology, Dresden University of Technology, Dresden, Germany; A. Lüderitz, ANNABURGER Nutzfahrzeuge GmbH, Annaburg, Germany

Fertilizer Optimization with high-tech Green Windows and Nitrogen Monitoring 45
M. Werner, L. Pindl, R. Hefele, T. Oksanen, TU München / Agrimechatronics

Harvesting Technologies and Efficiency

Experimental Data Acquisition for DEM Simulation of Threshing Processes 51
F. Uhlig, C. Korn, J. Schlenker, Institute of Natural Materials Technology, Chair of Agricultural Systems and Technology, Dresden University of Technology, Dresden, Germany
K. Strandgaard, M. Schaller, A. Andersen, AGCO A/S – Innovation Center Randers, Denmark

Evaluation of the airflow inside disc mowers to protect grassland insects 61
J. Frank, S. Erhardt, J. Steidle, Prof. S. Böttinger, University of Hohenheim, Stuttgart;
L. von Berg, O. Betz, University of Tübingen, Tübingen

Power Requirement of Rotary Mowers under No-Load Conditions 69
C. Brüning, C. Stumpe, S. Böttinger, Dept. Fundamentals of Agricultural Engineering,
Institute of Agricultural Engineering, University of Hohenheim

Autonomous Agricultural Robots

Fendt Xaver GT – Learnings from Autonomy and New Form Factors 75
J. Utz, T. Kranz, F. Schuler, AGCO GmbH, Marktoberdorf, Germany

Constraint-Driven Design of an Ultra-Lightweight Autonomous Planting Robot for UAV-Deployed Reforestation 83
J. Voigt, G. Happich, T. Weiser, Institute for Applied AI and Robotics (IKR),
Kempten University of Applied Sciences, Marktoberdorf, Germany

A UWB-Assisted Mobile Platform for Station-Based Environmental Monitoring in Livestock Barns 91
R. R. Shamshiri[1], D. Janke[2], M. Behjati[3], U. P. Schultz Lundquist[1], C. Weltzien[2,4]
[1] The Maersk Mc-Kinney Møller Institute, University of Southern Denmark, Odense
[2] Leibniz-Institut für Agrartechnik und Bioökonomie e.V., Potsdam, Germany
[3] Adaptive AgroTech Consultancy, Potsdam, Germany
[4] Technische Universität Berlin, Berlin, Germany

A Modular Mobile Sensing Platform for Real Environmental Data Acquisition 103
R. Hilker, C. Meltebrink, University of Applied Sciences Osnabrück, Germany

Safety, Testing & Design

Bridging the Normative Gap: A 4-Gate-Framework for the Automated and Secure Generation of Autonomous Operating Zones (AOZ) for ISO 18497-Compliant Machinery with imaging radar 109
HAW Kiel – Faculty of Agriculture Department Agricultural Technology, Osterrönfeld,
E. Hartung, Christian-Albrechts-Universität zu Kiel, Institute of Agricultural Engineering, Kiel

Operational Design Domains for Autonomous Agricultural Machinery: A systematic review of standards and their applicability 115
G. Happich, University of Applied Sciences Kempten, Kempten;
J. Schöning, Osnabrück University of Applied Sciences, Osnabrück;
M. Felske, J. Redenius, CLAAS E-Systems, Dissen a.T.W.

Methodology to identify relevant testcases for developing and validating safety-related sensor systems for autonomous agricultural machinery 123
D. Taubitz, M. Felske, CLAAS E-Systems GmbH Dissen a.T.W.;
G. Happich, Hochschule Kempten, Kempten; R. Weisgerber, Krone, Spelle;
A. Brunnert, CLAAS, Harsewinkel; N. Hummel, VDMA e.V., Frankfurt a.M.

How safe is safe enough? A smartphone-based scenario database for the risk assessment and validation of autonomous agricultural robots 133
M. L. Langer, H. Fichtl, J. Schlesier, Fraunhofer IVI, Dresden

AgTech Tillage

Potato-LITE – a regenerative approach to potato tillage Contribution by the Layered Destoner Concept 139
F. Pohlmann-Tasche, GRIMME Landmaschinenfabrik SE & Co. KG, Damme, Germany;
P. Graf Grote, GRIMME UK Ltd., Swineshead, United Kingdom

Acceleration sensors for determining the process parameters of tine-type soil cultivation equipment 147
M. Hengst, T. Herlitzius, Institute of Natural Materials Technology, TU Dresden
A. Reimelt, SYS TEC electronic AG, Heinsdorfergrund

Novel retrofittable deformation measurement system for spring tines in soil-cultivation implements 159
M. Ettrichrätz, L. Hamm, Moritz Krawczak, Fraunhofer Institute for Machine Tools and Forming Technology IWU
M. Hengst, Dresden University of Technology, Chair of Agricultural Systems Technology

Industrial Product Development

Development and Validation of a Knowledge-Based Methodology for the Conceptual Design of Potato Harvesting Systems 169
J. Roß, L. Voller, J. A. Kornhaas, M. Brinkmann, GRIMME Landmaschinenfabrik SE & Co. KG, Damme, Germany

From the analysis of user behavior to experimental validation in replacement testing – examples of a material handling machine and a field sprayer 175
M. Matthias, Chr. Bleicher, Fraunhofer Institute for Structural Durability and System Reliability LBF, Darmstadt

More than just rugged hardware: The software-defined approach for mobile agricultural and construction machinery 181
M. Rasumak, ITK Engineering GmbH, Lollar

Agricultural Robotics & Weeding

Field Evaluation of the JaetRobi Laser Weeder for Low-Power Apical Meristem Targeting in Autonomous Intra-Row Weeding 187
K. Koch[1], T. Schütte[1,2], D. Suhr[1], V. Tessaro[1,3], A. Jalali[1], V. Dworak[1], C. Weltzien[1,2,3]
[1] Department of Agromechatronics, Leibniz Institut für Agrartechnik und Bioökonomie (ATB), Potsdam
[2] Technische Universität Berlin, Chair of Agromechatronics, Berlin
[3] Joint Lab – Artificial Intelligence & Data Science, Osnabrück University, Osnabrück

Where is my robot going? A mixed-reality interface for visualizing autonomous agricultural robot missions 195
M. L. Langer, H. Fichtl, J. Schwarzenberger, Fraunhofer IVI, Dresden

Process Reliability, Self Diagnostics, Predictive Maintanance

Methods to ensure Process Reliability in Highly Automated Mowing 201
A. Grimm, L. Gerloff, J. Schattenberg, L. Frerichs,
Institute of Mobile Machines and Commercial Vehicles, Braunschweig

A Digital Wear Model for Soil-Engaging Tools Supporting Condition Monitoring, Self-Diagnostics, and Predictive Maintenance 209
M. Werner, G. Werner, J. Weber, Fraunhofer Institute for Machine Tools and Forming Technology IWU, Chemnitz, Germany
M. Hengst, S. Schwede, Institute of Natural Materials Technology, TU Dresden, Germany

Validation of a ChArUco-Based Method for End-Effector Precision Assessment in the JaetRobi Laser-Weeding Robot 217
V. Tessaro, Osnabrück University, Osnabrück; D. Suhr, K. Koch, A. Jalali, V. Dworak, C. Weltzien, Leibniz Institute for Agricultural Engineering and Bioeconomy, Potsdam; T. Schütte, Technische Universität Berlin, Berlin

Data-Driven Predictive Maintenance for Automated Agricultural Machines within the Feldschwarm Ecosystem 223
A. Griesing, J. Riebe, Estino GmbH, T. Herlitzius, M. Hengst, TU Dresden

Interoperability & Communication Systems

Architecting Interoperable Autonomy: Insights from the AEF Autonomy in Ag Initiative 229
R. Abel, T. Jacobson M. Dambrosio, CNH; C. Taylor, Hexagon;
A. Grever, D. Wesselmann, Maschinenfabrik Bernard Krone GmbH & Co. KG;
I. Tjalma, Kverneland Group; D. Lips, Amazonen-Werke H. Dreyer SE & Co. KG;
M. Hochwallner, Väderstad AB; A. Rocchi, Walvoil; A. Voltan, Maschio Gaspardo

Seamless Interoperability:
AEF Middleware for Wireless In-Field Communication 237
D. Steinmetzer, ITK Engineering GmbH, Rülzheim, Germany;
H. Warkentin, CLAAS E-Systems GmbH, Dissen a.T.W., Germany;
C. Kögel, AGCO GmbH, Marktoberdorf, Germany;
J. Witte, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel, Germany;
T. Nothdurft, AGCO GmbH, Marktoberdorf, Germany

Evaluating the Impact of Network Performance on Coordinated Agricultural Machinery using On-Demand Connectivity
An Application-Centric Evaluation of Connectivity Characteristics for Coordinated Unloading 243
S. Gimpel, Fraunhofer IESE, Kaiserslautern;
M. Reutemann, John Deere GmbH & Co. KG, Kaiserslautern

SOVD for High Speed ISOBUS: Challenges of Dynamic, Multi-Vendor Systems 251
B. Böhlen, Daten- und Systemtechnik GmbH; Aachen

Sensors & Application

Radar-Guided Region of Interest Localization for Image Based Person Detection in Agricultural Environments 263
N. Landmark[1], T. Schütte[1,2], J. Dietsche[1], C. Weltzien[1,2],
[1] Technische Universität Berlin, Fachgebiet Agromechatronik, Berlin, Germany;
[2] Leibniz-Institut für Agrartechnik und Bioökonomie e.V. (ATB); Technik im Pflanzenbau, Potsdam, Germany

Engineering Depth Perception: Design Principles and Systematic Evaluation of Mono, Stereo and Plenoptic Vision in Agricultural Automation by Effort and Performance Criteria 271
R. Weisgerber, A. Grever, Maschinenfabrik Bernard KRONE GmbH & Co. KG

Extending GS-BAU-71 for Agricultural Autonomy:
A Feasibility Study on Child Detection Validation 283
M. Komesker, R. Hilker, M. Jenz, C. Meltebrink, University of Applied Sciences Osnabrück, Osnabrück, Germany
S. Dittmar, Sozialversicherung für Landwirtschaft, Forsten und Gartenbau (SVLFG), Kassel, Germany

Artificial Intelligence for Precision Ag

Closed-Loop Kernel Fragmentation Control in Forage Harvesting: Real-Time CSPS Estimation and Automated Adaptation 291
S. Belau, D. Neitemeier, M. Klein-Helmkamp, S. Schiewer, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel; G. Gosden, CLAAS E-Systems GmbH, Nivå

UAV-Based Detection and Localization of Dock (Rumex spp.) in Norwegian Grasslands: An Error Budget Analysis for Centimeter-Level Precision Control 297
K. Bredesen, E. Forbes, I. A. Hameed, Faculty of Science and Technology, Norwegian University of Life Sciences (NMBU), Ås, Norway

Targeted Citizen-Science Image Selection for Robust Plant Detection in Data-Scarce Target Domains 303
D. H. Basavegowda, I. Igoulzan, C. Weltzien, Leibniz, Institute for Agricultural Engineering and Bioeconomy (ATB), Potsdam, Germany

Sensors & Simulation

Quality of Sensors in Agriculture From Development to Practical Evaluation 309
R. Schulenburg, A. Schaum, University Hohenheim, Stuttgart; M. Dirksen, C. Weltzien, Technische Universität Berlin, Berlin; H. Korte, University of Applied Sciences Osnabrück, Osnabrück; H. M. Heise, South Westphalia University of Applied Sciences, Iserlohn

4D Point Cloud Generator for LiDAR Sensors: Potential for Agricultural Applications 315
O. Oevermann, V. Nyhof, C. Meltebrink, University of Applied Sciences Osnabrück; U. L. Wüllner, M. Jordine, T. Biermann, R. Lachmayer, Institute of Product Development, Leibniz University Hannover; A. Aschinger, Z. Dai, T. Knieling, S. Viets, Scramblux GmbH, Hamburg

Use of ISFET measurement technology: Application examples for a mobile and a real-time nutrient measurement 321
S. Hinck, V. Riedel, C. Meltebrink, University of Applied Sciences Osnabrueck

Non-Destructive Tactile Ripeness Assessment of Avocados Toward Low-Waste Supply Chain Optimization 329
T. Ulrich, J. Lenz, D. Clever, Technische Universität Darmstadt, Institut für Robotische Systeme im Maschinenbau (IRM); F. Stuhlenmiller, ABB Robotics Deutschland GmbH, Friedberg (Hessen)

Power Trains, Electric Drives and Regenerative Energy

VarioSmart, the cost-efficient variable speed drive for fertilizer spreaders 337
M. Zimmer, RAUCH Landmaschinenfabrik GmbH;
M. Euler, Antriebstechnik-Roth GmbH

Analysis of Real-World Operating Profiles for Scalable Development of Electrified Tractors 343
D. Reiter, John Deere GmbH & Co. KG, Mannheim

Decentralised Energy Supply for Agricultural Machinery 351
F. Gerdes, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, TU Braunschweig

Greenhouse solar-tracking agrivoltaic system: Crop and electricity production in a Mediterranean greenhouse 361
N. Katsoulas, S. Faliagka, I. Naounoulis, Laboratory of Agricultural Constructions and Environmental Control, Department of Agriculture Crop Production and Rural Environment, University of Thessaly, Greece
C. Baxevanou, D. Feidaros, C. Papaioannou, Department of Agrotechnology, University of Thessaly, Greece
